EDUCATION

California State University - Fullerton
Masters Computer Science

August 2025 - Present

California State Polytechnic University - Pomona
B.S. Psychology; Member of Phi Kappa Tau Fraternity

August 2018 - May 2023

PROJECTS

“Magic: The Gathering” Deckbuilding Application

Github: <https://github.com/ToroDDT/MTG-Mox>

- Built a full-stack web application that uses integrates the Scryfall API to allow users to search and filter “Magic: The Gathering” cards based on multiple characteristics.
- Employed efficient data structures (e.g. hash maps, sets, lists) for fast card lookup, filtering, and caching to optimize search performance.
- Streamlined the deck-building flow by enabling users to send direct messages to local card shops with their completed deck list, requesting pricing.
- Designed and implemented a Java/Spring Boot MVC backend for handling REST API requests, deck management, and data persistence.
- Developed a React frontend with dynamic search, custom deck views, and interactive card list management for an improved user experience.
- Implemented Spring Security authentication to ensure secure access, restricting deck and card data to authenticated users only
- Managed user deck data: allowed authenticated users to create, edit, save, and view decks, with CRUD operations tying frontend and backend.

Password Manager Application

Github: <https://github.com/ToroDDT/Password-Manager>

- Built a secure full-stack web application for generating, managing, and storing user passwords and passphrases.
- Implemented password and passphrase generation algorithms with customizable parameters (length, character sets, and complexity rules).
- Designed form-based features allowing users to create, randomize, and manage credentials through an intuitive interface.
- Developed a Java/Spring Boot MVC backend for handling secure password storage, retrieval, and encryption using hashing techniques.
- Implemented full CRUD operations to allow authenticated users to create, edit, delete, and organize password entries efficiently.

SKILLS

Skills: Node.js, MySQL, MongoDB, SQL, Linux/Unix, HTML/CSS, MongoDB, Git, Agile, OpenAI, Data Structures and Algorithms, Full Stack, Backend, Frontend, Postgres Sql, REST APIs, Spring, Spring Boot.

Programming Languages: Java, Python, [React.js](https://react.dev/), Javascript, HTML, CSS, SQL

WORK EXPERIENCE

America’s Tire

Sales Apprentice

Upland, CA

August 2023 - Present

- Deliver excellent customer service by following up on service quality and resolving concerns, resulting in higher satisfaction scores.
- Monitor safety compliance among staff, ensuring adherence to workplace safety practices and reducing risk of incidents.
- Manage service workflow across 4+ technicians simultaneously, reducing wait times and increasing customer satisfaction scores.

LEADERSHIP EXPERIENCE

Phi Kappa Tau Fraternity — *Secretary*

Upland, CA

August 2022 - August 2023

- Oversaw chapter administration by managing attendance records, scheduling events, and documenting meeting minutes with accuracy and timeliness.
- Fostered teamwork and accountability by communicating clearly with members and supporting leadership in organizing chapter initiatives.
- Coordinated logistics for chapter events, ensuring smooth execution and strong member engagement.
